bnixon@conestogac.on.ca

Date: 25th May 2022

Subject: Request for Information

Dear Mr. Bill,

We have a basic understanding of the organization's concerns after reading the project document and meeting with the VP of Marketing. Furthermore, our team creates the PM document in order to better understand the areas for improvement and find prospects for developing a strategy that will guide the firm in the right direction.

Thanks & Regards,

Team P

1.2 Nondisclosure Agreement (NDA)

Oury Health Tech Ltd. (OHT)
and
Case Study participants
INFO8440 IT Business Analysis Operations 1372
Summer 2022

This Nondisclosure Agreement (the "Agreement") is entered into by and between **Oury Health Tech Ltd.** ("Disclosing Party"), and **Raj Priyavadan Pandya, Anubhav Verma, Abhishek Abhishek, Bharti Aggarwal, Mrunal Milind Badhe, Tazan Gosain, Siddharth Uday Kerwar** ("Receiving Party") to prevent the unauthorized disclosure of Confidential Information as defined below. The parties agree to enter a confidential relationship concerning disclosing certain proprietary and personal information ("Confidential Information").

1. Definition of Confidential Information. For purposes of this Agreement, "Confidential Information" shall include all information or material that has or could have commercial value or other utility in the business in which Disclosing Party is engaged. If Confidential Information is in written form, the Disclosing Party shall label or stamp the materials with the word "Confidential" or some similar warning. If Confidential Information is transmitted orally, the Disclosing Party shall promptly provide a writing indicating that such oral communication constitutes Confidential Information.

2. Exclusions from Confidential Information. Receiving Party's obligations under this Agreement do not extend to information that is: (a) publicly known at the time of disclosure or subsequently becomes publicly known through no fault of the Receiving Party; (b) discovered or created by the Receiving Party before disclosure by Disclosing Party; (c) learned by the Receiving Party through legitimate means other than from the Disclosing Party or Disclosing Party's representatives; or (d) is disclosed by Receiving Party with Disclosing Party's prior written approval.

3. Obligations of Receiving Party. Receiving Party shall hold and maintain the Confidential Information in strictest confidence for the sole and exclusive benefit of the Disclosing Party. Receiving Party shall carefully restrict access to Confidential Information to employees, contractors, and third parties as required and shall require those persons to sign nondisclosure restrictions at least as protective as those in this Agreement. Receiving Party shall not, without the prior written approval of Disclosing Party, use for Receiving Party's benefit, publish, copy, or otherwise disclose to others, or permit the use by others for their benefit or to the detriment of Disclosing Party any Confidential Information. The receiving Party shall return to the Disclosing Party any records, notes, and other written, printed, or tangible materials about Confidential Information immediately if Disclosing Party requests, it in writing.

4. Periods. The nondisclosure provisions of this Agreement shall survive the termination of this Agreement and Receiving Party's duty to hold Confidential Information in confidence shall remain in effect until the Confidential Information no longer qualifies as a trade secret or until Disclosing Party sends Receiving Party written notice releasing Receiving Party from this Agreement, whichever occurs first.

5. Relationships. Nothing contained in this Agreement shall constitute either Party a partner, joint venture, or employee of the other Party for any purpose.

6. Severability. Suppose a court finds any provision of this Agreement invalid or unenforceable. The remainder of this Agreement shall be interpreted to affect the parties' intent best.

7. Integration. This Agreement expresses the complete understanding of the parties concerning the subject matter and supersedes all prior proposals, agreements, representations, and contracts. This Agreement may not be amended except in writing and signed by both parties.

8. Waiver. The failure to exercise any right provided in this Agreement shall not be a waiver of prior or subsequent rights.

This Agreement and each Party's obligations shall be binding on such Party's representatives, assigns, and successors. Each Party has signed this Agreement through its authorized representative.

Disclosing Party: OHT

Title: Students in INFO8440

Dated: May 25, 2022

2 Client Background

2.1 History & General Description of OHT

Oury Health Tech Ltd, also known as the OHT. OHT is a KW based company in Ontario, Quebec, and Northeast US. OHT has been a successful, stable, and profitable manufacturer of medical imaging equipment for the last 10 years. OHT uses a business-to-business marketing method with a dedicated marketing /sales forces team. Retailers contact OHT by giving them orders, and in return, OHT builds the equipment, supplies it, and provides training for the same.

A couple of years ago, The CEO of OHT introduced a side project to create a wearable technology device just like Fitbit called TrackR. It was launched in the marketplace and had a good response from the customers. The device's hardware was suitable; however, the software had some issues. In 2017 the CEO of OHT hired a few developers to work on the upgradation of the software. But they were terminated after 3-4 months because they could not provide any breakthrough solution for the same.

The sales of wearable device units were down, and the medical imaging unit was subsidizing it. To a point that OHT is on the verge of becoming potentially bankrupt. OHT has no digital/online presence and still wants to deal in the B2B method. It was clear that the CEO's decisions had a detrimental impact on the organization, resulting in this dangerous situation and financial difficulties.

There are a few reasons which led to this situation.

- Lacking the requisite talent in high management for a company of this size.
- Unprepared for rapid expansion and growth.
- Each department head was given complete autonomy over all critical decisions without scrutiny.
- There was no established communications mechanism in place.

The company wants to improve its image and enhance the business process by assigning 2-3 marketing team members to the social media marketing team. It needs technical talents who will start from scratch. An executive dashboard needs to be created to view facts and figures based on which intelligent decisions can be made. OHT wants to establish a vision through the executive dashboard, implement key performance metrics and bring the company to a better position.

2.2 The Involved persons/roles/actors/stakeholders

Below is the list of persons involved in the project:

Position	Roles
1.CEO	CEO is the main person who holds all the responsibilities.
2.Financial V.P.	Looks after all the finance-related decisions of the organization.
3.Human resource V.P.	Looks after the salary and employee satisfaction across the organization
4.Marketing V.P.	Handles all the B2B relations and is also responsible for marketing and advertising.
5.I.T. V.P.	Keeps information on all the technological needs of the organization. Makes sure devices are up to date.
6.Facilities V.P.	Makes sure that all the systems are running properly, and all the machines are well maintained.
7.Manufacturing Vice President	Deals with production-related tasks and budgeting coordination with the financial department.

2.3 The current Business Challenges of OHT

Below are the challenges faced by OHT:

- I. The first challenge OHT is facing is that due to some bad decisions they are on the verge of bankruptcy.
- II. Their product TrackR is not successful as they predicted it to be and due to that, it has also affected their medical imaging as well.
- III. OHT does have a strategic report. But they do not have any means to get any forecast due to which they are in dire need of a Strategic report as well.

2.4 The Brand(s) involved, and their current statuses

OHT has a lot of competition when it comes to markets who are trying to expand their reach in the market as far as possible. Below are some of the competitors of OHT:

- I. Apple
- II. Samsung
- III. Fitbit
- IV. Garmin
- V. Nike
- VI. Samsung

Despite all the competition, TrackR was still successful in the initial years. And at present, their focus is to make TrackR as refined and have its market reach as far as possible.

Brands involved are OHT, Medical imaging scanners and Trackr.

2.5 The As-Is principles or key metrics of OHT

These are principles that OHT is working on:

- I. OHT needs to change its approach with mutual understanding.
- II. OHT needs to increase its market reach by selling more.
- III. To survive in the long run OHT needs to change its tools as well.
- IV. OHT needs to use current software like PowerBI to keep track of everything.
- V. OHT also must analyse its competition and must see where they stand on it.
- VI. OHT also needs to be open to any critique.

3 Scope

3.1 Overview

CDL organization has been in the business of selling Medical Imaging Equipment for several years. TrackR is a high-end watch launched in 2015 that connects with the software that collects data from the device. The year 2015 was very profitable as the market responses were positive, but later that year, the challenges seemed to grow as the retailers could not sell the products because of high rates.

These changes in the market brought CDL to the verge of bankruptcy. The biggest reason was found to be an overestimation of the software. The software produced to collect data from the hardware was not good enough, and as a result, it was not user-friendly.

3.2 Client requirement

The following are the OHT requirements:

1. Developing a dashboard for the organization is the primary task.
2. Power BI is the primary software that will be used for metric visualization.
3. 6 key metrics are required for the dashboard.
4. Real-time data performing and dashboard execution.

3.3 Project Deliverables

Below is the list of deliverables that we have to deliverables:

1. Letter of Transmittal
2. Cover Page
3. TOC
4. Doc History
5. Page Hdrs, Ftrs Numberings
6. Executive Summary
7. Assumptions
8. Conclusions
9. RFIs
10. Unanswered Questions
11. Background and Overview of Client
12. Systems and Actors
13. Business Challenges
14. Current Brand Status
15. Actors and Interactions
16. Detailed References for all Sources of Knowledge
17. RFI report included as an Appendix.
18. INFO 8440 Project Scope - Updated as Needed
19. Regular Project Management and Time Effort Reporting through meetings
20. RACI Workbook submission
21. Possible Future Analysis and Development
22. Measuring Success and Failure
23. Probable Risks and Benefits of the Suggestions in this Project
24. Audience of the Presentation is well defined, and the presentation is appropriate for that audience.
Presentation gives highlights of team's work, and regularly encourages audience to refer to the report and supporting materials. Presentation encourages audience to embrace business change thru the suggestions.
25. The team, and each member, must show that they are acting more as BA's, not developers.
26. All the Knowledge that the Team has collected throughout the entire project should be in the final report, and/or in the accompanying files.
27. List, References and General Details of Suggested Metrics
28. Metric 1 - Data needed, Interpretation, Value to Decision Makers
29. Metric 2 - Data needed, Interpretation, Value to Decision Makers
- 30.
31. Metric 3 - Data needed, Interpretation, Value to Decision Makers
32. Metric 4 - Data needed, Interpretation, Value to Decision Makers
33. Metric 5 - Data needed, Interpretation, Value to Decision Makers
34. Metric 6 - Data needed, Interpretation, Value to Decision Makers
35. Interview and/or survey of 6 OHT VPs
36. Data Listing of 6 OHT VPs Measurements of Business Success

37. Data Listing of 6 OHT VPs attitudes toward change, and cooperation in management
38. Data Listing of 6 OHT VPs visions for a better managed OHT
39. Data Listing of 6 OHT VPs Response to Meeting 3 times per week
40. Interview and/or survey of 6 OHT VPs
41. Data Listing of 6 OHT VPs Monthly Finance Reports Used
42. Listing of 6 OHT VPs Knowledge of Computer Based methods of Report Circulation.
43. Listing of 6 OHT VPs Computer Skills, Dashboard Tech Understanding
44. Listing of 6 OHT VPs Preferred learning style
45. Listing of 6 OHT VPs Preferred ways to implement new concepts
46. VP's Written Briefing on Data Lakes, Data Marts, Data Warehouses, including SWOT
47. VP's Written Briefing on ERP. TPS and Query tools, with SWOT
48. VP's Written Briefing on Executive and Analytical Dashboards
49. suggested plan background to implement an Executive Dashboard with 5, at minimum, metrics
50. suggested plan vision to implement an Executive Dashboard with 5, at minimum, metrics
51. suggested VP training plans
52. suggested plan needs / requirements to implement an Executive Dashboard with 5, at minimum, metrics
53. suggested plan actions to implement an Executive Dashboard with 5, at minimum, metrics
54. suggested plan deliverables to implement an Executive Dashboard with 5, at minimum, metrics
55. suggested plan resources to implement an Executive Dashboard with 5, at minimum, metrics
56. General configuration of Executive Dashboard using PowerBI
57. Executive Dashboard Metric 1 using TrackR Data Generator Data
58. Executive Dashboard Metric 2 using TrackR Data Generator Data
59. Executive Dashboard Metric 3 using TrackR Data Generator Data
60. Executive Dashboard Metric 4
61. Executive Dashboard Metric 5
62. Executive Dashboard Metric 6
63. Executive Dashboard annotated list of elements for the dashboard,
64. Executive Dashboard pseudo code for parts of the dashboard where actions must be performed, or decisions are made,
65. Executive Dashboard menu / system map
66. AS-IS persons / roles / actors and interactions of Executive Decision-Making operations
67. AS-IS principles of OHT and/or Executive Decision-Making operations
68. AS-IS process flow, pseudo code of Executive Decision-Making operations
69. a Gap analysis / identification of faults for Executive Decision-Making Process
70. To-Be persons / roles / actors and interactions of Executive Decision-Making operations
71. To-Be process flow, pseudo code of Executive Decision-Making operations
72. To-Be principles of Executive Decision-Making operations
73. Guidance on Using the Dashboard - Video or Text+Graphics
74. TrackR Data Gen metric Data Sources List and DB Schema
75. TrackR Data Gen metric Data Sources Data Overview / Profile
76. Executive Dashboard Style Guide for Navigation Principles, Colours, Fonts
77. Executive Dashboard Navigation Guide using Text, Wireframes and Mockups for Moving forward
78. Executive Dashboard Navigation Guide using Text, Wireframes and Mockups for Moving backward

79. Executive Dashboard Navigation Guide using Text, Wireframes and Mockups for Changing Time Frames
80. Basic education on Agile Development environment and methods.
81. Guidelines and guidance on evolving the dashboard and its metrics.
82. Executive Dashboard Operation / Executive Decision-Making Process - 3+ Risks and Possible Mitigations
83. Letter of Transmittal,
84. Cover Page,
85. Table of Contents
86. Document History
87. Page Hdrs, Ftrs Numberings
88. Executive Summary
89. Assumptions / Unanswered Questions
90. Conclusions
91. Requests for Information with NDA (included as an Appendix)
92. Background and Overview (History) of Client,
93. Business Challenges,
94. Current Brands Involved and their Statuses
95. Detailed References and Sources
96. Known Client Requirements
97. Initial Project Scope in an Appendix, Changes to Scope in a Report Section
98. Possible Future Analysis and Development for Executive Decision-Making Process
99. Measuring Success and Failure in Changing the Executive Decision-Making Process
100. Probable Benefits of Changing the Executive Decision-Making Process
101. RACI+, Documentation, Backup Sheets
102. Time and Effort Reporting
103. Gantt Sheet, connected to RACI data.
104. USE CASE Diagram(s) for all involved persons, roles, actors, and systems showing their interactions
105. Cockburn templates for all identified interactions.

3.4 Activities

Following is the list of activities involved during project:

- Conduct research
- Identify the metrics
- Virtual meetings with VP
- Produce the questionnaire
- Build a Strategic report
- Perform a SWOT analysis
- Create dashboard
- Update dashboard

- Identify data sources
- Identify the risk factors
- Creating and identifying data sources
- Perform project scope and the related updates
- Present final report

4 Tools & Techniques

4.1. RACI plus Date Due, Date Start, and Date Done for all Deliverables, Activities, and Class Activities

Please refer RACI+ excel file uploaded on eConestoga

4.2. Work Breakdown Structure

Below is the snapshot of the work breakdown structure (WBS) that we have created in MS Visio:

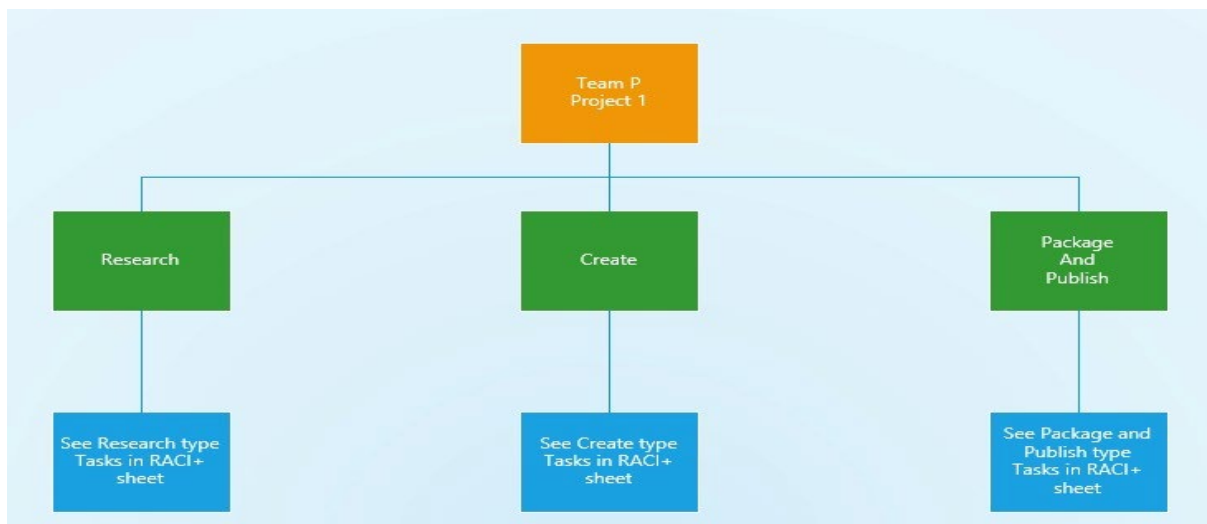

Fig 1.1 (Work Breakdown Structure)

4.3. Gantt Chart

Please refer RACI+ excel file uploaded on eConestoga

4.4. Team Contract and Structure

4.4.1 Team Contract

Code of Conduct: As a project team, we will:

- Define the purpose of this team and project objectives clearly.
- Work towards the goal of the project collectively.
- Maintain integrity and professionalism in the workplace.
- Focus on what is best for the team.

Participation: We will:

- Encourage each team member to participate and share their ideas.
- Ensure clarity and honesty throughout project activities.
- Use appropriate methods and tools to facilitate problem-solving.
- Reschedule group meetings and make sure all the team members are informed.

Communication: We will:

- Keep the Project Leader informed with nominal or significant risks.
- Communicate using Microsoft Teams or Zoom.
- Make use of emails for sending any important updates about the project.
- Provide productivity reports to the Project Leader on time.

Problem Solving: We will:

- Avoid conflict of interests and listen actively.
- Collaborate ideas and choose the best option.
- Determine the cause of the problem in case any.
- Provide positive feedback (no criticism) to resolve the issues.

4.4.2 Meeting Guidelines

We will:

- Attend meetings as per the schedule and inform the Project leader in case we are unable to make it to the meeting.
- Conduct time-efficient meetings.
- Set proper agenda and action items.
- Record meeting minutes and share them with all the team members.

Academic Integrity Affirmation

I confirm that this work is my own and I have not copied from the internet, other student(s), or any other sources. I followed the individual/group work guidelines specified for completing this assignment. My work is incomplete adherence with Conestoga College's academic integrity policy.

Name	Signature	Date
Abhishek Abhishek	Abhishek Abhishek	May 25,2022
Bharti Aggarwal	Bharti Aggarwal	May 25,2022
Mrunal Milind Badhe	Mrunal Milind Badhe	May 25,2022
Raj Priyavadan Pandya	Raj Priyavadan Pandya	May 25,2022
Tazan Gosain	Tazan Gosain	May 25,2022
Anubhav Verma	Anubhav Verma	May 25,2022
Siddharth Uday Kerwar	Siddharth Uday Kerwar	May 25,2022

5 Considerations

5.1 List and description of risks

Below given is the list and description of some of the risks:

S. No.	Description	Risk response	Risk impact	Risk probability
1	Lack of clarity	Lack of Communication mitigated by timely deployment updates from all Members to ensure that changes to all Tasks are done.	Moderate	Low
2	Information/ document loss	After task completion, all data can be backed up to the cloud or work directly with multiple users on cloud-based tools.	Critical	Medium
3	Unclear project schedule	Project progress meeting for understanding the plan and reducing the missed tasks by going through upcoming tasks weekly	Moderate	Medium
4	Finance estimating error	Reevaluate/analyze project scope and set turning points.	Critical	Low
5	Project conflicts not escalated on time	Timely team meetings and project review and stakeholder plan for possible conflicts.	Critical	Medium
6	Unplanned work to be accommodated	Equal task distribution among all members and according to the given schedule.	Moderate	Medium

5.2 Style Guide

Below given is the list of style guides used throughout:

Style	Font	Size	Color	Example
Heading 1	Calibri Light (Heading)	16	Blue	Heading 1
Heading 2	Calibri Light (Heading)	13	Blue	Heading 2
Body	Calibri Light (Body)	11	Black	Body

Background Image: Blank

Table Design: Grid Table 5 Dark Accent 1

5.3 Team performance and Management of Project

Team performance is an essential factor for the project to succeed as all the team members collectively guide the project on the correct path. Everyone must have a clear goal and vision of what they are trying to achieve. The following factors will be considered throughout this project:

- Understand the problem at hand: It is most important that before we even start the project, we understand what the problem is and get to the core of the problem and find a solution accordingly.
- Time: Minimal changes within the timeline of the project are allowed, however it will be unacceptable to not complete the tasks within time.
- Risks: All the risks arising during the project should be considered and dealt with without affecting the project in any way.
- Constructive Feedback: Open communication will be encouraged and rather than criticizing, constructive feedback will be given to work upon.
- Celebrating Success: Small successes in the project will be celebrated to show team appreciation and to keep them highly motivated.
- Setting good leadership example: It is important to set few rules, show what a leader looks like, show the team members can trust the leader and to be accountable for the project.
- Establishing metrics to measure success: We will decide on certain metrics to measure success of the project and to track our performance.

5.4 Project Measures of Success

We will use the following points to measure our project's success, track our progress to ensure we are on the right track, and address any conflicts that may hinder the current team's performance.

- All the team members being present for all meetings.
- Encouraging ideas from each team member.
- Make use of emails for sending any important updates about the project.
- Having healthy discussions to resolve any conflicts.
- Monitoring each team member's contribution and performance.
- Having minimal errors throughout the project.
- Completing the project on time and within the allotted budget.
- Giving each goal a priority and having a clear vision.
- Successfully implementing the dashboard and reviewing customer feedback.
- Having an effective change management strategy.
- Executive Dashboard having proper data display, readability and professional language.
- Significant improvement in the decision-making process at OHT Ltd.

5.5 List and descriptions of assumptions

The following are the OHT list of descriptions of assumptions:

- The cost of maintaining the Executive Dashboard using Power BI has been approved.
- Employees are well trained in the latest technology.
- Everyone understands the metrics of the dashboard and have approved them.
- The CEO is excited for the change and use Agile method.
- The dashboard has only received positive feedback.

6. List of Metrics for dashboard

As OHT is under a crisis condition where they want to improve its decision-making capabilities. So, we came up with a solution where they can take decisions based on the data of the following metrics: -

➤ *Metric 1: - Unit Cost of Production*

That's the cost of manufacture for a specific product in a given sales quarter of a year.

Metric Value: This data will help managers to keep track of their unit costs. Once the organization grows back again. And if they introduce new products in the future this metric will help them keep track of it.

Data needed: The unit cost of production from the product table.

➤ *Metric 2: - MSRP*

That's the maximum selling price for a specific product in a given sales quarter of a year.

Metric Value: This data will help them understand their own and competitors' markets as well. By viewing this metric, they can adjust the prices according to the times.

Data needed: MSRP from the product table.

➤ *Metric 3: - Markup $((\text{MSRP} - \text{Unit Cost of Production}) / \text{Unit Cost of Production}) * 100$*

That's the subtraction of the MSRP of a product and the unit cost of production. It's frequently expressed as a percentage of the total cost.

Metric Value: To cover the costs of doing business and make a profit, a markup is added to the overall cost borne by the manufacturer of a good or service.

Data needed: MSRP and unit cost from the product table.

➤ *Metric 4: - Profit Margin $(\text{Markup} / (1 + \text{Markup})) * 100$*

Profit margin is the distinction between income and cost of goods sold.

Metric Value: This will help managers to determine how much profit they can make from their product.

Data needed: Derived from Markup metric.

➤ *Metric 5: - Sales Target*

The quantity of products targeted in a specific sales quarter of a year.

Metric Value: This metric will provide insight into what areas of sales they should take aim for. What product to invest more in, and what channel of advertisement to invest more in in the future.

Data needed: Sales target assigned by the managers from the product table.

➤ *Metric 6: - Wholesale Price*

It is the wholesale price quoted by management for a particular TrackR.

Metric Value: This metric data will help them understand their own and competitors' markets as well. By viewing this metric, they can adjust the wholesale price according to the times.

Data needed: Wholesale price from the product table.

➤ *Metric 7: - MinToMake*

That's the time taken by OHT to build a particular TrackR.

Metric Value: This data will help managers to capture the time to build the TrackR. This metric data can help management to increase their efficiency to produce new products.

Data needed: The MinToMake from the product built and shipped table.

➤ *Metric 8: - Quantity*

This measure indicates how many units of a specific TrackR are manufactured in a given quarter of the year.

Metric Value: This information will help them in determining how much quantity we need to create in order to compete with our rival.

Data needed: Quantity from the product built and shipped table.

➤ *Metric 9: - Customer Feedback*

This metric will give information about the percentage of gender in different countries based on their feedback for the TrackR.

Metric Value: This metric will help the management to improve their product based on the customer feedback and they can prioritize their work accordingly.

Data needed: Customer feedback from customer feedback table.

7. AS-IS Process Flow: -

Please refer to the AS-IS diagram submitted on eConestoga.

7.1 AS-IS persons/ roles/ interactions/ details

Skills, Concern and Attitude

Billy Bob – OHT CEO

- Skills - Founder of OHT
- Concern - Not able to manage employees and plan out the thing with facing potential bankruptcy.
- Attitude - Make efforts to increase the sales of TrackR and save the company from bankruptcy.

IT VP

- Skills - Creative mindset, web developers, critical thinking
- Concern – Inexperienced in handling big projects.
- Attitude – Works hard and delivers successful projects.

Finance VP

- Skills – Accounting, Calculations, Stock Knowledge
- Concern – Did not plan and is facing potential bankruptcy.

- Attitude – Make sure the sales of the company are increased.

Marketing VP

- Skills – Good communication skills and market knowledge
- Concern – Unable to increase the sales of TrackR.
- Attitude – Likes to try and implement new strategies to increase the sales.

Human Resources VP

- Skills – Good communication skills
- Concern – Recruiting people
- Attitude – Excited to work on new projects

Manufacturing VP

- Skills – Knowledge of supply chain management and customer service
- Concern – Production costs
- Attitude – Manage workforce in the warehouse and reduce production costs.

Facilities VP

- Skills – Make sure to provide all the facilities.
- Concern – Make end-user happy and satisfied with the product delivered.
- Attitude – Provide solutions and services

7.2 AS-IS principles of OHT: -

- A vision towards the better supervised company.
- Make sure to improve their product sales.
- Issues or ideas that would help in the project.
- Meeting all the executives three times per week.
- Improving management for the success of the company.
- Using PowerBI as software to generate visually understandable statistical data.
- Open for suggestions and last-minute changes if there's need.

7.3 AS-IS pseudo code: -

START

Meeting held

IF "VP's have clear vision"

THEN "Financial status discussed"

ELSE "CEO foresees matter"

END IF

End

7.4 Gap Analysis: -

Focus Groups	Current State	Desired Future State	Action Plans
Finance	Insufficient money leading to potential bankruptcy	Increase sales of TrackR	Implementing dashboard
Time	Analyze and understand data from reports submitted by finance team	Reduce time analyzing the data using the dashboard	Build the dashboard
Interaction	Difficult to meet all the executives with different schedules	All the details which are to be discussed are present in the dashboard	Develop the dashboard for employees
Decision making	Tracking performance of a single time is hard	Data tracking is smooth which makes decision making an easy task	Implementing the dashboard for analyzing data
Data transparency	Documents are not accessible to all the employees at one point	Everyone can access and analyze data at the same time	Multiple users can access the dashboard
Paper based	Some of the details are missed	Everything is online and is accessible to everyone	Developing the graphical layout

8. TO-BE

8.1 To-Be persons / roles / actors and interactions of Executive Decision-Making operations.

Will be same as AS-IS.

8.2 To-Be process flow, pseudo code of Executive Decision-Making operations

Please refer to the pdf named TO-BE and PSEUDOCODE submitted in eConestoga.

8.3 To-Be principles of Executive Decision-Making operations.

Same as AS-IS above.

8.4 Guidance on Using the Dashboard - Video or Text+Graphics

Please refer the link below to access the video.

https://conestogac.zoom.us/rec/share/trbZOmbZqVSfuJeJkXm3flhDjt9fX1Q4gUVvP_9onA2DFB8SIPurrad7SgbV_eww.Zpuxi5bg7n7TgtG3

9. TrackR Data Gen Metric Data Source list DB Schema

Below is the ER diagram of the TrackR Data Gen: -

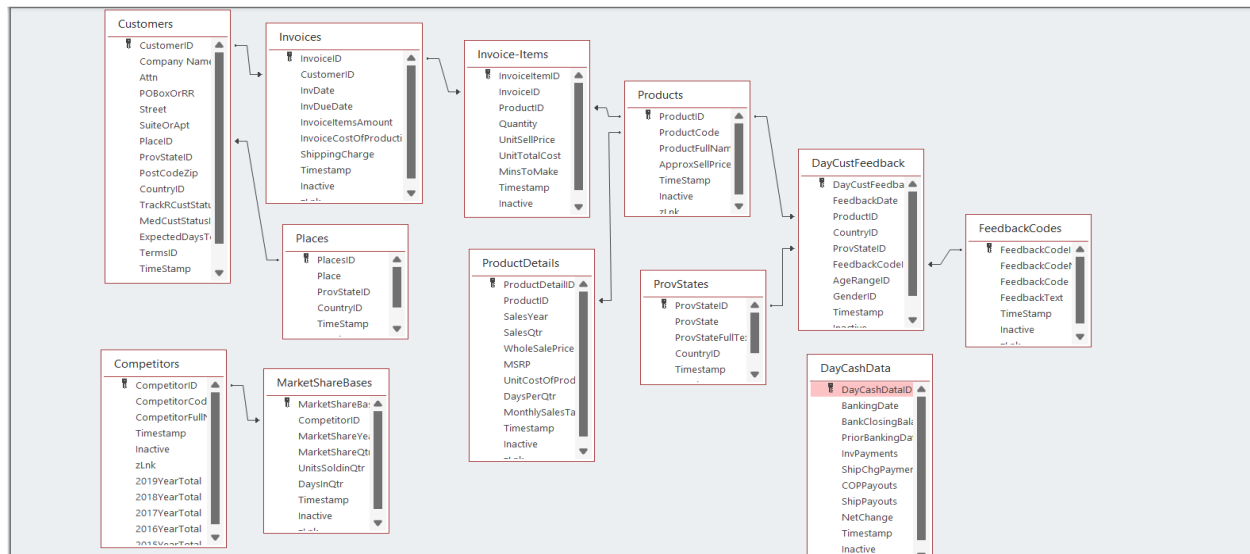

Fig 1.4 ER Diagram of TrackR Database

As mentioned in the list of metrics required in the dashboard below are the list of data tables that we require in order to get the data for the metrics.

1. **Product:** - Product table contains the information about the product's (TrackR) unit cost of production, maximum selling retail price, wholesale price and monthly targets over years.
2. **Daily TrackR's Built:** - This table contains the information about the product-built date and the quantity produced over each quarter of a year.
3. **Customer Feedback:** - This table contains the information about the customer feedback of people in different countries based on the TrackR's user friendliness.
4. **Competitors:** - This table contains the information about the quantity produced by all the competitors over time.

10. Use case Diagram

Please refer to the Use case diagram submitted on eConestoga with the name Use case diagram.

11. Wireframes and Mockups

Please refer to the Wireframes and mockups file submitted on eConestoga with the name Wireframes for Executive Dashboard and Mockups for Executive Dashboard respectively.

12. Agile Development Environment

Agile methodology is the technique to get products faster into the market. When an organization supports agile project management, it functions in an agile environment. A company that adapts to the agile development environment promotes change and innovation. The company also encourages working in collaboration with other team members.

Different methods of **Agile Development Environment** are:

- ❖ Scrum – Consists of cycles/ stages, known as sprints.
- ❖ Kanban – Consists of consistent communication and transparency.
- ❖ Extreme Programming – Encourages the developers to accept changes in customer requirements.
- ❖ Lean Development – Removal of tasks that have no or minimal value in the project.

13. Guidance on Metrics

As OHT is in crisis, they want to improve their decision-making capabilities. So, we came up with a solution where they can take decisions based on the data of the following metrics: -

- ❖ Metric 1: Unit Cost Of Production
- ❖ Metric 2: MSRP
- ❖ Metric 3: Markup $((\text{MSRP} - \text{Metric 1}) / \text{Metric 1}) * 100$
- ❖ Metric 4: Profit Margin $(\text{Markup 3} / (1 + \text{Markup}) * 100)$
- ❖ Metric 5: Sales Target
- ❖ Metric 6: Wholesale Price
- ❖ Metric 7: MinToMake
- ❖ Metric 8: Quantity
- ❖ Metric 9: Customer Feedback

All these metrics will help OHT VPs to get information on:

1. How much money they are spending on each product.
2. What region are their sales the highest.
3. What parts of apps they should work on.
4. What wholesale price they are getting their parts on.
5. How much they want to spend on a particular product.

6. What is the current profit margin.
7. What is the unit cost of each product.
8. How much Markup they are earning.
9. How much sales Target they have achieved.

14. Cockburn Use Case

USE CASE #	1	
USE CASE	Login	
Goal in Context	Allows user to login into the account	
Scope & Level	User logs in to access the dashboard	
Preconditions	Should have account to login	
Success End Condition	Login successful	
Failed End Condition	Login failed	
Primary, Secondary Actors	Primary: End User Secondary: System Administrator	
Trigger	Dashboard can be used to analyze reports once user is logged in	
DESCRIPTION	Step	Action
	1	Open Dashboard
	2	Enter Username and Password to login
	3	Enter submit to access dashboard
EXTENSIONS	Step	Branching Action
	1a	Authentication

USE CASE #	2	
USE CASE	Analyze Reports	
Goal in Context	Reports are analyzed to evaluate the company's performance	
Scope & Level	User analyzes reports to keep track of company's performance	
Preconditions	Search the report	
Success End Condition	Report analyzed successfully	
Failed End Condition	Reports contain insufficient data; incomplete analysis	
Primary, Secondary Actors	Primary: VP Secondary: CEO	
Trigger	Reports are analyzed to check performance with competitors	
DESCRIPTION	Step	Action
	1	Login to Dashboard
	2	Search for reports to conduct analysis
	3	Start analysis based on metrics
EXTENSIONS	Step	Branching Action
	2a	Search Reports

USE CASE #	3	
USE CASE	Provide Support	
Goal in Context	To provide necessary support in case of challenges	
Scope & Level	Support provided to make dashboard usage easy.	
Preconditions	Create Dashboard	
Success End Condition	Provide support to tackle any challenges	
Failed End Condition	Unable to help users overcome challenges	
Primary, Secondary Actors	Primary: Business Analyst Secondary: End User	
Trigger	Support is provided so that the user can resume work without delays	
DESCRIPTION	Step	Action
	1	Create Dashboard
	2	Train employees to handle challenges
	3	Provide support to those in need
EXTENSIONS	Step	Branching Action
	3a	Create Dashboard

USE CASE #	4	
USE CASE	Update Database	
Goal in Context	To update database for better analysis	
Scope & Level	Ensure database is updated to provide better reports	
Preconditions	Collect Data for Database and create database	
Success End Condition	Database successfully updated with correct data	
Failed End Condition	Data insufficient	
Primary, Secondary Actors	Primary: System Administrator Secondary: End User	
Trigger	Successful updation of database will help collect proper data	
DESCRIPTION	Step	Action
	1	Categorize data based on needs
	2	Collect data
	3	Enter collected data into database
EXTENSIONS	Step	Branching Action
	4a	-

15. Possible Future Analysis and Development for Executive Decision-Making Process

Below is the Possible Future Analysis for the Executive Dashboard.

1. As the dashboards will be easy to use and since we are using graphics instead of numbers. It will be easy for the OHT VPs to collaborate with each other and communicate information with each other as well. It will also help them to save some time as well.
2. As we knew from the meeting, at the end of the day the finance VP makes sheets of excel. Printout sheets are used at the end of the day. Therefore, this executive dashboard will save them a lot of paper and it helps keep track of finances easily.
3. From the same meeting we also came to know that VPs are using excel sheets. And we all understand that reading specific data from a thousand rows of sheets is a heavy task. Therefore, this dashboard will make it easier for them to investigate data and do future predictions based on that.
4. As this Dashboard will be online. It will be easier for the OHT executives to access it anytime and from anywhere they wish to. Which will give them more freedom to access data.
5. As the Dashboard is spread across a couple of pages it will be convenient for OHT VPs to compare the data across their multiple products.

17. Interview/ Survey Questions

Sr No	Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
1	How are monthly financial reports used	I read them carefully	They are reviewed in detail	I'm constantly checking them	I hope all the VP's read them carefully.	I add more Excel calculations to them	I glance at them, and check them carefully about 2-3 days later
2	Would you consider improving your computer skills in a particular technology?	I am doing that constantly, but little bits at a time	I do this when it's necessary	Yes	Yes	I guess	Only if I can see what problem it might solve for me.
3	Would you prefer qualitative methodology (data which cannot be collected in numerical form) or quantitative methodology (data collected in numbers)?	I'll answer for everyone else on this ... We don't know how to answer this question.					
4	What are the goals of your department ?	TO market OHT products to our existing and potential; customers	To support all IT activities in OHT	To professionally manage OHT's financial affairs.	To manage OHT's human assets in the crazy world we work in.	To design and build OHT products.	To keep OHT's facilities safe and operational

5	How are suggestions to improve processes implemented?	Currently, we just react to crises	Only if we have the money to fund the change.	We receive the suggestions, study them, and act only if the payback is really good and the cost is small.	Right now, they're not.	Only if they are low or no cost do we make changes	Change? What's that?
6	What is your preferred learning style? (Auditory learners, Visual learning style, Kinesthetic learning style, Reading/writing style)	Reading / writing style	Reading / writing style	Reading / writing style	Reading / writing style	Reading / writing style	Don't know.

18. Listing of 6 OHT VPs Knowledge of Computer Based methods of Report Circulation

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
Would you prefer qualitative methodology (data which cannot be collected in numerical form) or quantitative methodology (data collected in numbers)?	The Marketing VP on behalf of every other VP has stated that they are unable to answer this question	N/A	N/A	N/A	N/A	N/A

19. Listing of 6 OHT VPs Computer Skills, Dashboard Tech Understanding

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
Would you consider improving your computer skills in a particular technology?	The Marketing VP constantly ups his skills but bit-by-bit	The IT VP would like to improve their skills when they want to learn something new	The Financial VP would like to improve their computer skills	The HR VP would like to improve their computer skills	The Manufacturing VP is still unsure about upgrading their skills but maybe will do	Only if it helps solve a problem will the Facilities VP upgrade their skills

20. Listing of 6 OHT VPs Preferred learning style

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
What is your preferred learning style? (Auditory learners, Visual learning style, Kinesthetics learning style, Reading/writing style)	The Marketing VP prefers the reading style or writing style	The IT VP would like the reading style or writing style as their preferred learning style	The Financial VP prefers the reading style or writing style	The HR VP would like the reading style or writing style as their preferred learning style	The Manufacturing VP prefers the reading style or writing style	The Facilities VP is unsure which learning style they prefer

21. Listing of 6 OHT VPs Preferred ways to implement new concepts

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
How are suggestions to improve processes implemented ?	The Marketing VP's current focus is to tackle the upcoming crisis	The IT VP states that changes will take place provided they have sufficient funds	The Financial VP states that they receive the suggestions, study them, but act only if the payback is good and the cost is small.	The HR VP mentions that there are currently no plans to implement new concepts	If the changes are low or do not cost, then changes are made states the Manufacturing VP	The Facilities VP is unsure about changes

22 Data Listing of 6 OHT VPs Monthly Finance Reports Used

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
How are monthly financial reports used?	The Marketing VP carefully reads the reports	The IT VP and their team review all the details and changes carefully	Any changes made are checked upon by the Financial VP	The HR VP makes sure all the other VP's read the reports	Excel calculations are added to the reports by the Manufacturing VP	Reports are checked by the Facilities VP 2-3 days later

23. Interview and/or survey of 6 OHT VPs

S.No.	Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
1	What are some of your department's significant challenges?	Evolving to use both B2B and B2C marketing	Too much work for too few people	None	Keeping everyone motivated in these days of great uncertainty	Reducing labour costs	Getting money to do maintenance projects.
2	How often do all the VP's meet every month/week?	They don't. However, the IT VP, Finance VP and I meet about once per week	Zero	Maybe once every 3 months	They don't		
3	According to you what is the vision you have for better	You've already got my ideas	Whatever the Marketing VP thinks will work.	A culture where we strive to make as few mistakes as possible	All 6 of us working as a team	Truly having a management team	I don't have time to think about this.

	organised OHT?						
4	what are your thoughts on cooperation in management in your company?	We've got to change, or we're going to die. We need the mngt team working as a team.	Change - it's constant, and filled with challenges. OHT managers need to officially work as a team.	I like change for the better. Managers have to cooperate, but often they don't do it well.	I wish that the pace of change would slow down a bit. OHT needs more formal mngt cooperation	change happens all the time; we have to cooperate	I'd prefer the world a few decades ago, when life was simpler. Cooperation? In this company? Everybody wants my group to do stuff, but they won't give me the cash to get it done.
5	What are your thoughts on measurements of business success?	Customer Satisfaction, Repeat Business, Profit	All IT systems running normally, a capable user community, and a minimal repair backlog.	All the usual financial measures	Profit, Employee Contentment and Productivity	Profit, Production capacity utilization, failure rates, and Cash Flow	Only a few items in the repair backlog, and all systems (heating, electricity, etc) are working well
6	How would you react to change in organisations business process?	We've got to change, or we're going to die. We need the mngt team working as a team.	Change - it's constant, and filled with challenges. OHT managers need to officially	I like change for the better. Managers have to cooperate, but often they don't do it well.	I wish that the pace of change would slow down a bit. OHT needs more formal mngt	change happens all the time; we have to cooperate	I'd prefer the world a few decades ago, when life was simpler. Cooperation? In this company?

			work as a team.		cooperation		Everybody wants my group to do stuff, but they won't give me the cash to get it done.
--	--	--	-----------------	--	-------------	--	---

24.Data Listing of 6 OHT VPs Measurements of Business Success

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
What are your thoughts on measurements of business success?	Customer satisfaction, repeat business, and profit are all important factors.	All IT systems are operational, there is a capable user community, and there is a small repair backlog.	All of the standard financial indicators are used.	Profit, employee satisfaction, and productivity are all important factors.	Profit, capacity utilisation, failure rates, and cash flow are all factors to consider.	There are only a few items on the repair list, and all of the systems (heating, electricity, etc.) are in good operating order.

25. Data Listing of 6 OHT VPs attitudes toward change, and cooperation in management

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
How would you react to change in organisation's business process?	We have no choice but to change, or we will perish. We need the management team to work together.	Change is unavoidable and fraught with difficulties. Officially, OHT managers must work as a team.	Change for the better appeals to me. Managers must cooperate, yet they frequently fail to do so effectively.	I'd like to see the rate of change slow down a little. OHT requires more formal management collaboration.	Change is constant; we must work together.	I'd rather live in a world from a few decades ago, when things were easier. Cooperation? Are you working for this company? Everyone wants my group to do something, but no one will give me the money to make it happen.
what are your thoughts on cooperation in management in your company?	We have no choice but to change, or we will perish. We need the management team to work together.	Change - it's constant and filled with challenges. OHT managers need to officially work as a team.	I like change for the better. Managers have to cooperate, but often they don't do it well. 						won't give me the cash to get it done.
--	--	--	--	--	--	--

26. Data Listing of 6 OHT VPs visions for a better managed OHT

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
According to your what is the vision you have for better organised OHT?	Marketing VP has already shared the vision i.e to bring the OHT to better position.	Whatever the Marketing Vice President believes will work.	We want to live in a culture where we try to make as few mistakes as possible.	We were all working together as a team of six.	Having a true management team	I don't have time to consider it.

27. Data Listing of 6 OHT VPs Response to Meeting 3 times per week

Questions	Marketing Vice President	IT Vice President	Financial Vice President	Human Resources Vice President	Manufacturing Vice President	Facilities Vice President
How often do all the VP's meet every month/week ?	They don't have any. The IT VP, Finance VP, and I, on the other hand, meet around once a week.	Zero	Perhaps once every three months.	They don't have any.	-	-

28. General configuration of Executive Dashboard using PowerBI

Below is the configuration of the software required to access the executive dashboard:

- Latest version of PowerBI with licence for easily accessing the executive dashboard.
- Windows 8.1 (or later) / Windows Server 2012 R2
- .NET Framework 4.6.2 or later
- Version 11 or later of Internet Explorer
- Memory (RAM): A minimum of 2 GB is required, with 4 GB or more being preferred.
- Processor: 1 GHz 64-bit (x64) processor or above is recommended.
- WebView2, if it wasn't installed with Power BI Desktop or if it was uninstalled.

28.1 Annotated list of Dashboard Elements

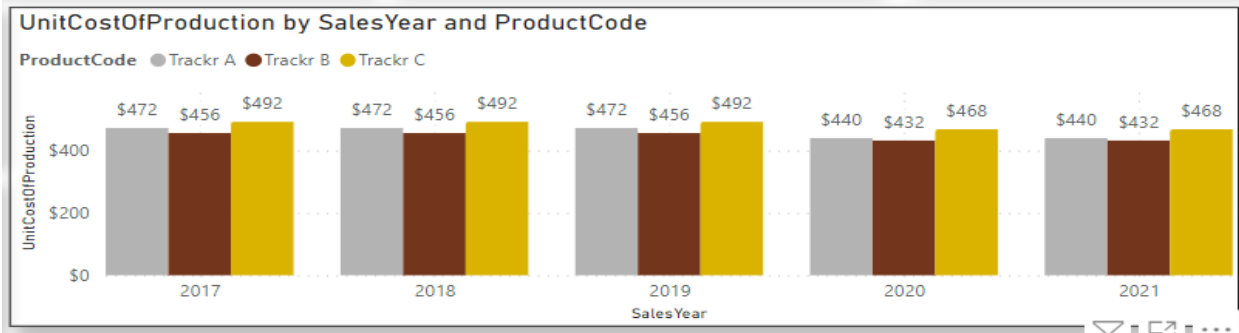

Metric 1: - Unit Cost of Production

Visualization: -

1). *Line and clustered column chart and,*

2). *Card*

Metric Value: - This metric gives the year over year information about the unit cost of production for different TrackR's and it's going to help management to invest money based on the historical data.

\$6.94K
UnitCostOfProduction

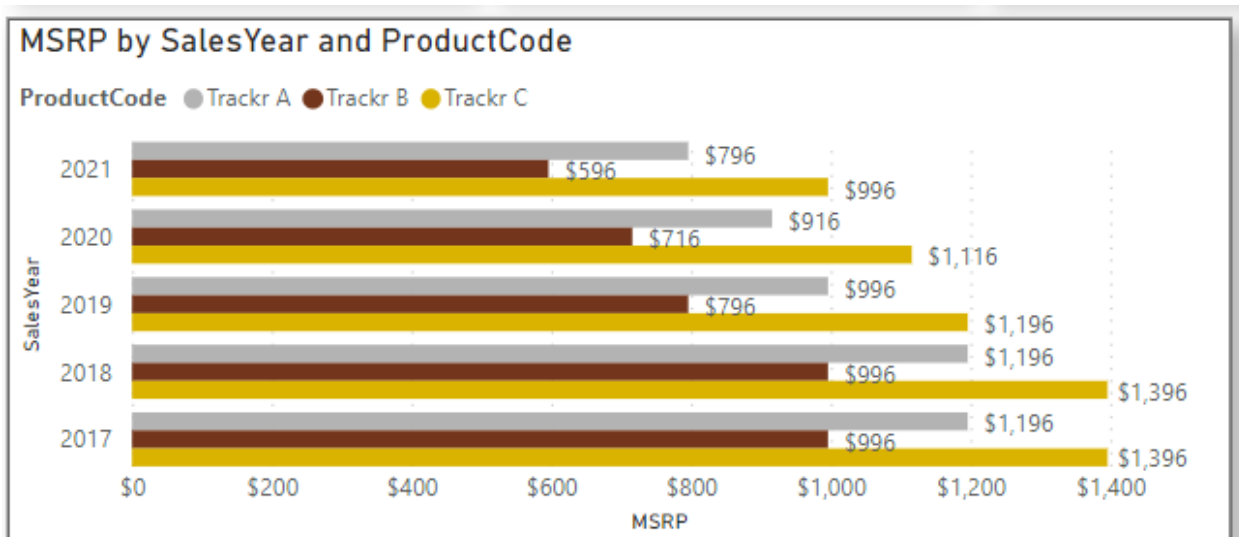

Metric 2: - MSRP

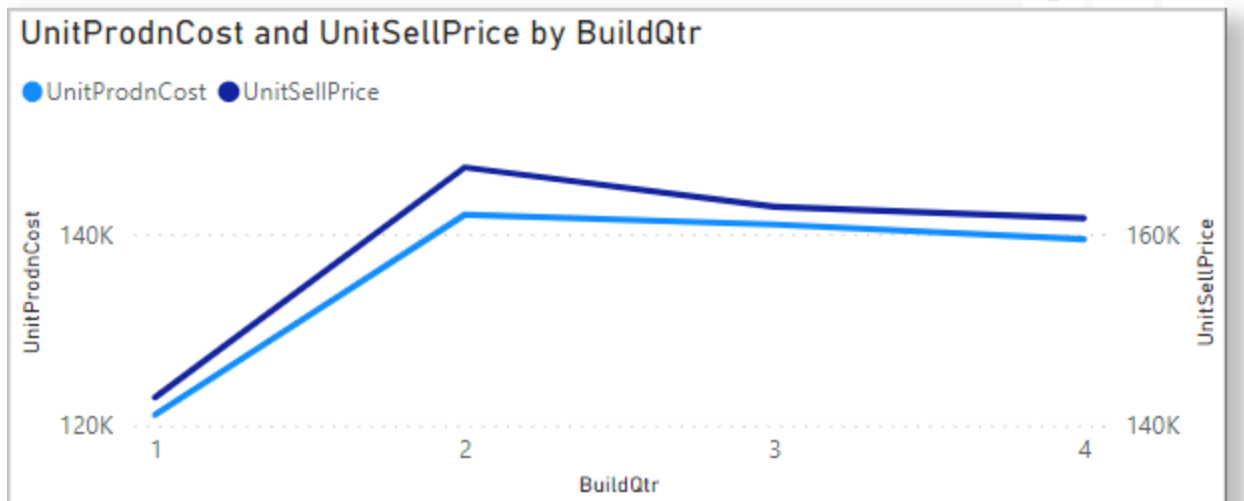

Visualization: -

1). Clustered bar Chart

2). Line Chart

Metric Value: - This metric gives the year over year information about the MSRP for different TrackR's and it's going to help management to set MSRP in order to get higher sales based on the historical data.

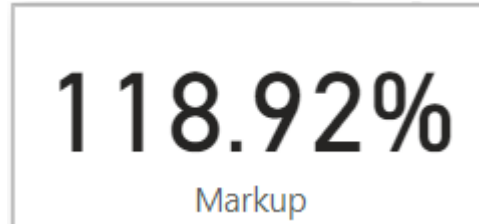

Metric 3: - Markup ($((\text{MSRP} - \text{Unit Cost of Production}) / \text{Unit Cost of Production}) * 100$)

Visualization: - Card

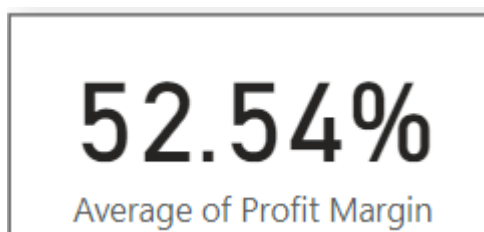

Metric Value: - A markup is added to the overall cost by the manufacturer of a good or service to cover the costs of doing business and make a profit.

Metric 4: - Profit Margin ($(\text{Markup} / (1 + \text{Markup})) * 100$)

Visualization: - Card

Metric Value: - This will help managers to guide how much profit they can make from their product.

Metric 5: - Sales Target

Visualization: - Card

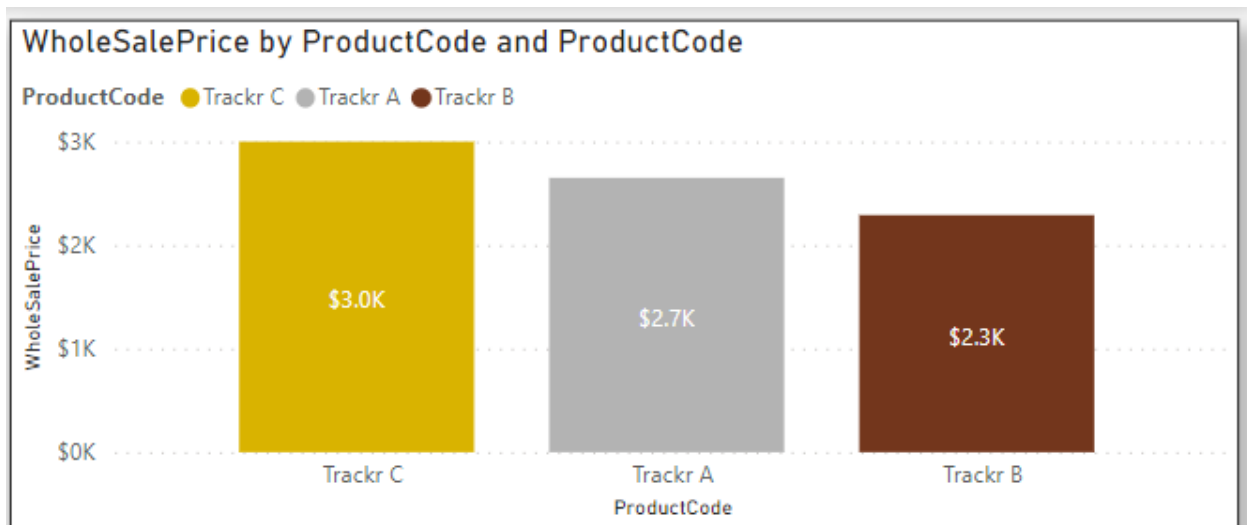

Metric Value: - This will help managers to set target of their sales for a specific year and month of quarter to compete with their rivals.

Metric 6: - Wholesale Price

Visualization: - Stacked Column Chart

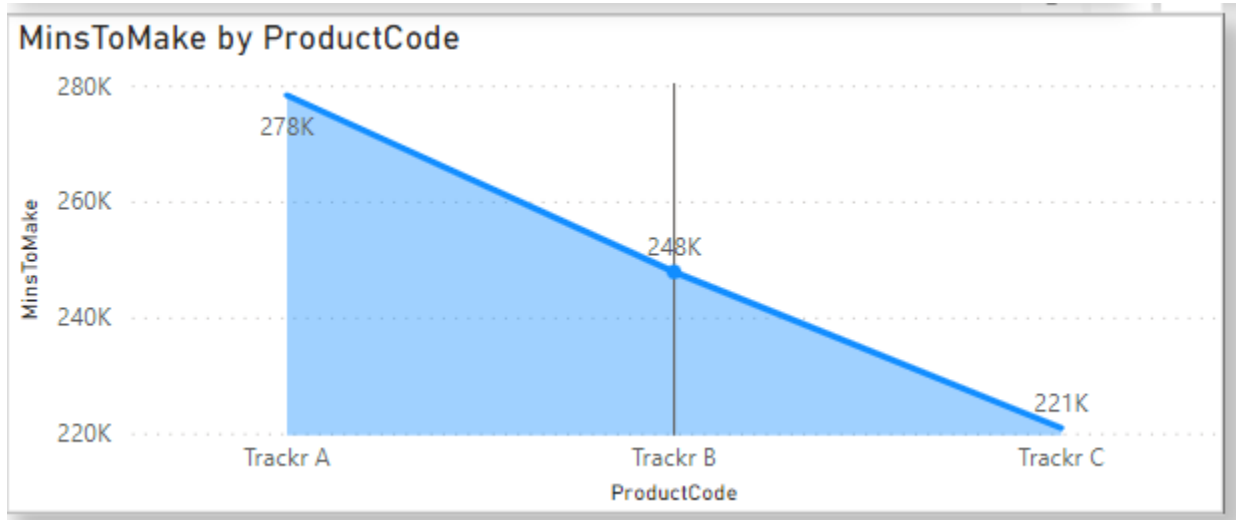

Metric Value: - This metric gives the year over year information about the wholesale price for different TrackR's and it's going to help management to set wholesale price in order to get higher sales our product.

Metric 7: - MinToMake

Visualization: - Area Chart

Metric Value: - This metric gives the year over year information about the time taken by OHT to produce different TrackR's and it's going to help management to increase efficiency of production in order to compete with rivals.

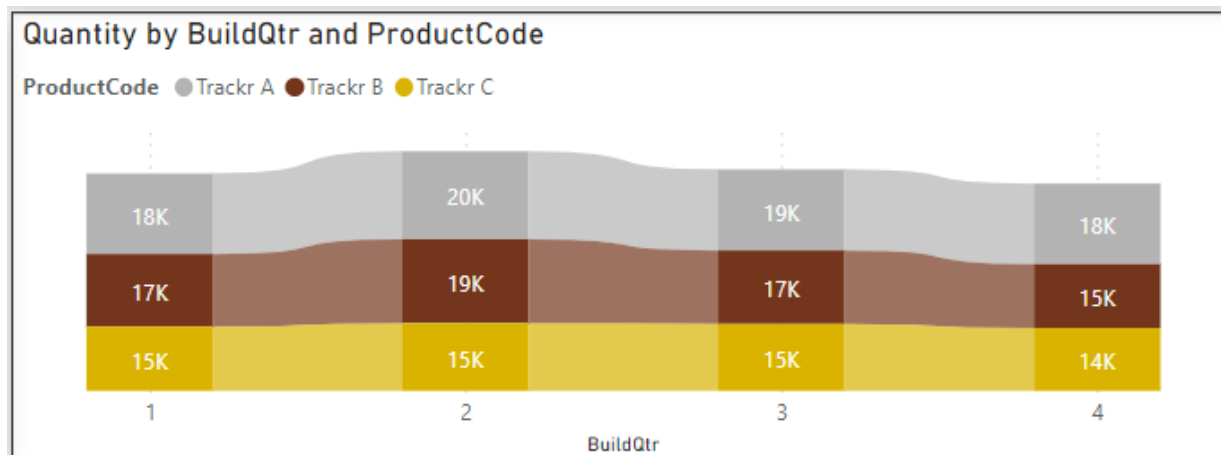

Metric 8: - Quantity

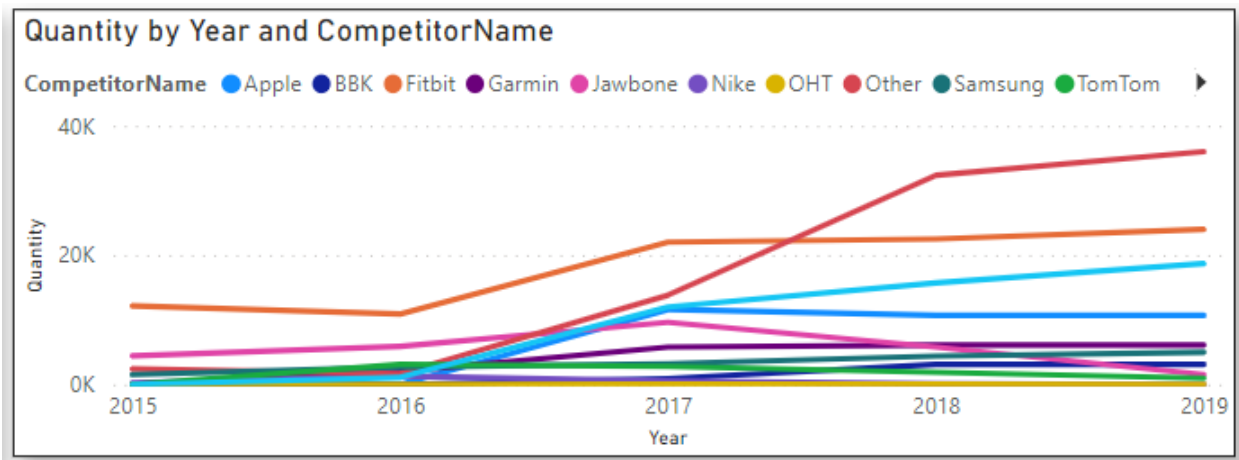

Visualization: -

1). Ribbon Chart

2). Line Chart

Metric Value: - This metric gives the year over year information about the quantity of different TrackR's produced by OHT in each quarter and it's going to help management to achieve the target of specific TrackR as per the market demand.

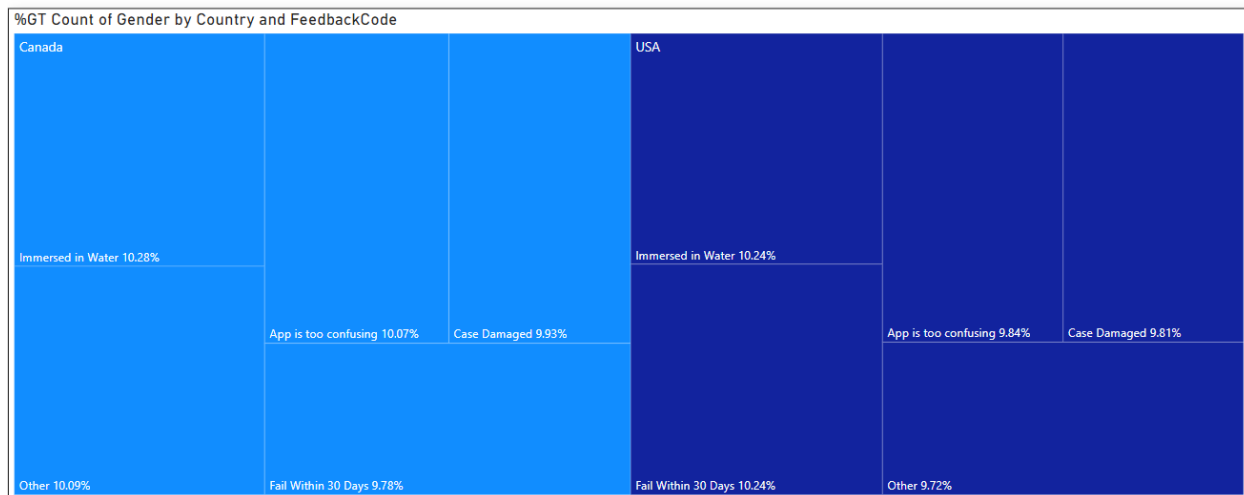

Metric 9: - Customer Feedback

Visualization: - Tree map

Metric Value: - This metric gives the information about the percentage of people in different countries facing the challenges with the different TrackR.

29. System Map

Please refer to the file system map submitted on eConestoga.

30. Executive Dashboard Operation / Executive Decision-Making Process - 3+ Risks and Possible Mitigations

Risk 1 : Internal miscommunication causes a lack of clarity and doubt regarding the team's goals.

There will be times when one or more members of the group misunderstand something, resulting in erroneous assumptions and expectations. When a member of a team is unable to obtain or comprehend precise information, their interpretation may be incorrect, resulting in project delays.

TECHNIQUE OF MITIGATION:

- A project manager should allocate tasks to each team member based on their skill set and make everyone's responsibilities and objectives clear, which will promote trust and purpose.
- Each colleague should update their work in the group on a regular basis to ensure that it is easy to follow, survey, and provide feedback; this will increase efficiency.

Risk 2: The project's deliverables are running late. (Delay in project completion)

Unexpected events may cause a breach in synchronization between plan and execution, causing project deliverables to be delayed.

TECHNIQUE OF MITIGATION

- If a delay occurs, the project manager should double-check the deliverables and assist in every way possible to bring the project back on schedule.
- The client should be informed of the delay and given a thorough explanation as to why it occurred.
- Keep an eye on the Gantt chart at all times to catch any timeline slippage as soon as feasible.

Risk 3: Unexpectedly increased workload that needs to be accommodated

Changes in scope can be requested by anyone involved in the project, including project team members. Adding new features and capabilities can have uncontrolled effects on the schedule, budget, and resources available.

TECHNIQUE OF MITIGATION

Any planning assumptions should be documented and conveyed to project management before the project begins.

- When changes to a project are requested, the team should determine whether they are feasible within the present budget.
- They should research the advantages of the alteration before implementing it.
- Regardless of the budget increase, each modification request should be approved by the client to ensure that the customer wants the modifications made.

Risk 4: Problems with the technology

Failures of energy or Wi-Fi, as well as issues with equipment such as laptops that are unable to save documents, can cause a delay in work, perhaps jeopardising the completion of the entire project.

TECHNIQUE OF MITIGATION

Every team member should use OneDrive to sync data between their PC and the cloud since it allows users to access their files from anywhere, including the OneDrive website. If one device fails, they may always use another to access data from the cloud and resume work.

31. Executive Summary

OHT went to work on its first wearable fitness monitor in January 2014, after ten successful years as a commercial maker of medical imaging. To get to the production phase as soon as possible OHT skipped focus groups, beta testing, and user needs. As a critical component in the development of new goods, the company began to experience concerns that may have been avoided in the early stages of TrackR. Overnight, many teams to manufacture and maintain the product were formed. These groups contributed to the production's increased speed. While ignoring the consequences of a poor product. The corporation did observe an uptick in sales after the launch. However, many orders were returned because the goods did not meet the customer's expectations. The company was unprepared to deal

with the feedback and did not respond quickly enough. Given the size of the newly formed teams, the corporation has been incurring excessive costs while expecting higher profits. Soon, the company was on the verge of going bankrupt. To avoid any further harm, OHT must be able to assess, analyse, and plan measures to return the organisation to profitability. We should be able to come up with damage control and future project plans that will not only keep the company out of bankruptcy but also satisfy investors.

32. Client Background

Oury Health Tech Ltd, also known as the OHT. Established in 1998. OHT is KW based company having its presence in Ontario, Quebec, and Northeast US. OHT has been a successful, stable, and profitable manufacturer of medical imaging equipments for the last 10 years. OHT uses Business to Business marketing method having a dedicated marketing /sales forces team. Retailers contact OHT by giving them orders and in return OHT builds the equipment, supplies it, and provides training for the same.

In 2016, The CEO of OHT introduced a side project to create a wearable technology device just like Fitbit called Trackr. Billy Bob has decided to bypass focus groups, beta testing, and user requirements elicitation for TRACKR and its associated user software in order to expedite development. In August of 2016 OHT converts one of its warehouse areas, close to the shipping/receiving dock, into the new TRACKR manufacturing area.

In 2017, Trackr was launched in the marketplace and had a pretty good response from the customers. OHT estimated that 5,000 new TRACKR users will join each month, and that these numbers will remain steady for the next 2.5 years before any major growth can be seen.

The hardware of the device was good however, the software had some issues. In October of 2017 the CEO of OHT hired a few developers to work on upgradation of the software. But they were terminated after 3-4 months because they were not able to provide any breakthrough solution for the same.

In July 2018, when a major "big Box" store returned around 7,000 TrackRs and informed OHT that they would no longer sell the units, OHT Management was astounded. Customers appear to be dissatisfied with the TrackR application.

The sales of wearable device units were gone down, and the medical imaging unit was subsidizing it. To a point, that OHT is on the verge of getting potentially bankrupted. OHT has no digital/online presence and still wants to deal with the B2B method. It was clear that the CEO's decisions had a detrimental impact on the organization, resulting in this dangerous situation as well as financial difficulties.

There are a few reasons which led to this situation.

- Lacking the requisite talent in high management for a company of this size.
- Unprepared for rapid expansion and growth.
- Each department head was given complete autonomy over all critical decisions, with no scrutiny.
- There was no established communications mechanism in place.

The company wants to improve its image and make enhancements in the business process by assigning 2-3 marketing team members to the social media marketing team. Needs technical talents who will start from scratch. The CEO wants to modify how they worked previously because it was ineffective and causing huge problems, thus he needed an effective and impactful makeover to help solve the problems. An executive dashboard needs to be created in order to view facts and figures based on which smart decisions can be made. OHT wants to establish a vision through the executive dashboard, implement key performance metrics and bring the company to a much better position.

33. The business challenges

1. Customers aren't interested in the product, so it's impossible to sell it. As a result, it is experiencing financial difficulties, which is leading to the company's bankruptcy.
2. Internal communication issues are causing challenges for the company. Since there is no communication amongst the teams. And on top of that the CEO is not listening to any of the department heads.
3. CEO fired the software developers who were close to bringing a solution to the table.

34. The brand(s) involved, and their current statuses

Brands involved are OHT, Medical imaging scanners and Trackr.

OHT has few competitors

1. Apple
2. Samsung
3. Fitbit
4. Huawei
5. Garmin

35. Probable Benefits of Changing the Executive Decision-Making Process

Organizations can evaluate their decision-making structure and strategically allocate responsibility. Assessing the current operating model and modifying decision-making to match the envisioned future state operating model is the goal of refining decision rights. Improving choice performance requires using these building components and then addressing decision biases to improve decision results. If companies can do both, they will have better decision-making results, which will provide them a competitive advantage.

1. Increased employee motivation

Employees are more likely to be engaged when they understand how their contribution matters and how it might help the company achieve its goals.

Employees can also share and discuss ideas when decisions are a matter of discussion. This increases staff engagement and may lead to more creative approaches to making such decisions.

2. Improved customer retention

It is sense to consult your customers before making a decision that will have an influence on them.

You can gather insights from your sales, customer service, and technical support teams, as well as important customers, in a shared decision-making process, such as the one we used for our product manager.

You can also conduct client surveys and utilise the results to guide your selections. Customers are more likely to stay involved with your product if they sense you're listening to and fulfilling their requirements and wishes.

3. More effective change management

You've probably heard the statistic that 70% of change attempts fail owing to a lack of communication and buy-in.

However, when executives, front-line managers, and employees make decisions together, communication is more open and frequent. This can help to increase buy-in at all levels.

4. There will be fewer unforeseen consequences.

No one wants to make a blunder in their business. You may not have all the knowledge you need while deciding on your own, which increases the chance of making a poor decision. That's terrible for business, and it could cost you your job.

You're less likely to stumble into challenges you didn't expect once you've made your decision if you receive more viewpoints and information during the decision-making process.

36. Time and Effort Reporting

Please refer RACI+ excel sheet uploaded on eConestoga.

37. Conclusion

The sole purpose of this project is to give a holistic view of the organization, understand the market and the competitors better and identify key performance indicators. This Executive dashboard will not only help OHT Ltd overcome the issues they have in their organization, but it will also help them make better decisions and bring a significant change.
